

Weekly HW 3

Show your work for each of the following problems.
 This Homework is due on or before **FRIDAY**.

M:	<p>The side labeled has been chosen as the base for this parallelogram. Draw a segment showing the height corresponding to that base.</p> <div style="text-align: center;">  </div>	<p>Find the area of this parallelogram:</p> <div style="text-align: center;">  </div>
T:	<p>Which of the following pairs of base and height produces the greatest area?</p> <p style="margin-left: 40px;"> A. $b = 4, h = 3.5$ B. $b = 0.8, h = 20$ C. $b = 6, h = 2.25$ D. $b = 10, h = 1.4$ </p>	<p>Find the area of the shaded region:</p> <div style="text-align: center;">  </div>
W:	<p>On the grid, draw a quadrilateral that can be decomposed into two identical triangles with a single cut (show the cut line).</p> <div style="text-align: center;">  </div>	<p>Triangle R is a right triangle. Can we use two copies of Triangle R to compose a parallelogram that is not a square? If so, explain how or sketch a solution. If not, explain why not.</p> <div style="text-align: center;">  </div>
Th:	<p>Find the area of the triangle. Explain or show your reasoning.</p> <div style="text-align: center;">  </div>	<p>A parallelogram has a base of 3 units and an area of 1.8 square units. What is the corresponding height for that base?</p>
